Inspection Numbers attached with this checklist:

OPERATOR TRAINING REQUIREMENTS

Reportable Observations: The following points shall be included & reported as a result of reviewing the Operator Training Log (Appendix A of ANSI/ALI ALOIM:Current Edition or equivalent). These points may not necessarily result in a failed automotive lift inspection when evaluated solely in accordance with the Periodic Qualified Inspection requirements of ANSI/ALI ALOIM:Current Edition. However, they may negatively impact customer's compliance with applicable codes, standards, & regulations (i.e. building/electrical codes, OSHA, Provincial Health & Safety).

Each lift operator is required to have an Operator Training Log (OTL) indicating each lift they are trained to operate. The OTL is considered compliant if all required signatures are present, there are no blank spaces & it has been update within the last 12 months.

Record the name of each lift operator & compliance findings Indicate if addendum sheet is used <input type="checkbox"/>	Is there an OTL	All signatures present on OTL	Ensure no blank spaces on OTL	OTL updated in last 12 months
	Yes No	Yes No	Yes No	Yes No

PLANNED MAINTENANCE REQUIREMENTS	Yes	No
---	------------	-----------

Is there a completed Planned Maintenance Log (Appendix G from ANSI/ALI ALOIM:Current Edition or equivalent) for each lift (Prepared and maintained by owner)

- Are all required signatures on completed log

- Verify there are no blank spaces on the completed log (there shall be no blank spaces)

Reportable Observations: The following points shall be included & reported as a result of reviewing the Planned Maintenance Log (Appendix G of ANSI/ALI ALOIM-Current Edition or equivalent). These points may not necessarily result in a failed automotive lift inspection when evaluated solely in accordance with the Periodic Qualified Inspection requirements of ANSI/ALI ALOIM:Current Edition. However, they may negatively impact the customer's compliance with applicable codes, standards, & regulations (i.e. building/electrical codes, OSHA, Provincial Health & Safety).

Planned Maintenance Details (add additional sheets as necessary). Indicate if addendum sheet is used.

Report each lift that ***DOES NOT*** meet the minimum content requirements identified above for Planned Maintenance Log

Manufacturer	Model	Serial Number

Report each lift that ***DOES NOT*** meet the minimum planned maintenance frequency recommendations of the manufacturer

Manufacturer	Model	Serial Number
